

ROLESVILLE MICROTRANSIT (FY25)

Project Type: New Microtransit Zone

Project overview: This project would create on-demand “microtransit” to parts of Wake Forest and Rolesville that were previously served by the GoWake SmartRide NE pilot and in replacement of the 401X Rolesville Express. It would provide connections between Rolesville and Wake Forest, including access to fixed route bus service. Details on the service area, including exact boundaries, hours of service, and estimated wait times will be determined during a future project study with service providers, contractors, and the communities.

Major destinations: none

Related capital investments: none

Related service changes: Elimination of the 401X
